PROFESSIONAL PROFILE

Public health and epidemiology professional with a Master of Public Health (MPH) in Epidemiology and a clinical background in nursing and primary healthcare. Combines field-level health experience with practical expertise in disease surveillance, epidemiological analysis, health data management, health information systems, monitoring and evaluation, and data visualization.

Proficient in Python, SQL, Power BI, Excel, R, SPSS, and DHIS2, with hands-on experience cleaning and analysing public health datasets, developing epidemiological indicators, producing health reports, and building interactive dashboards for data-driven decision-making.

Experienced in maternal and child health, immunization activities, routine health reporting, community health, clinical service delivery, and public health fieldwork in resource-limited settings. Strong interest in disease surveillance, epidemic intelligence, public health informatics, health systems strengthening, digital health, and evidence-based programme implementation.

CORE COMPETENCIES & TECHNICAL SKILLS

CORE COMPETENCIES

- Epidemiology & Public Health
- Disease Surveillance & Outbreak Support
- Public Health Informatics & DHIS2
- Data Management & Quality Assessment
- Monitoring & Evaluation (M&E / MEAL)
- Data Visualization & Dashboard Design
- KPI & Epidemiological Indicator Development
- Maternal & Child Health / Immunization

TECHNICAL SKILLS

- Data Analysis:** Python, SQL, R, SPSS, Microsoft Excel
- Health Systems:** DHIS2, Electronic & Routine Health Reporting
- Visualization:** Microsoft Power BI, Dashboards, Data Storytelling
- Epidemiological Analytics:** Data Cleaning, EDA, Trend & Geographic Analysis
- Monitoring & Reporting:** Performance Indicators, Data Quality, MEAL

PROFESSIONAL EXPERIENCE

EPIDEMIOLOGIST – HEALTH SURVEILLANCE — Health Delegation – Mendoubia

Abéché, Chad | 11 May 2026 – Present | Practicum & Volunteer

- Conduct health surveillance activities and support routine monitoring of priority diseases and public health events.
- Collect, validate, clean, and analyse surveillance data from health facilities and community-level sources.
- Support DHIS2 data entry, reporting, data quality review, and monitoring of routine health indicators.
- Monitor disease trends and epidemiological patterns to identify unusual increases and potential public health alerts.
- Participate in outbreak investigation and response activities, including data collection, case monitoring, field follow-up, and reporting.
- Prepare daily, weekly, and monthly surveillance reports and epidemiological summaries for public health programme teams.
- Conduct field visits and collaborate with health facilities and health-sector stakeholders to improve surveillance reporting and data quality.
- Support immunization and vaccine-preventable disease surveillance activities and contribute to community-level public health monitoring.
- Use Excel and data analytics tools to organize, analyse, visualize, and communicate surveillance findings.
- Participate in coordination meetings and communicate epidemiological findings and recommendations to relevant health authorities and programme teams.

HEALTH PRACTITIONER / NURSE — Al-Ghufran Medical Clinic

Abéché, Chad | 2022 – 2023

- Delivered frontline clinical care to 50+ patients daily across general outpatient and maternal health services.
- Supported disease monitoring, patient documentation, case reporting, and referral coordination.
- Maintained accurate clinical and health information to support routine reporting and service monitoring.
- Contributed to improvements in internal reporting workflows and access to clinical and surveillance information.
- Supported infection prevention, service quality, and adherence to clinical care protocols.
- Trained and supported staff on care procedures, infection prevention, and service quality standards.

HEALTH PRACTITIONER / NURSE — Sheikh Hussein Hassan Health Center

N'Djamena, Chad | 2021 – 2022

- Supported maternal and child health services, including 200+ assisted deliveries.
- Participated in immunization campaigns reaching 1,000+ community members.
- Prepared routine service reports and health trend summaries to support management decisions.
- Supported patient triage, preventive healthcare, and community outreach activities.
- Contributed to health information documentation and routine monitoring of service delivery.

SELECTED PUBLIC HEALTH & EPIDEMIOLOGY PROJECTS

GLOBAL DENGUE SURVEILLANCE ANALYSIS — Python | Epidemiology | Power BI

- Conducted end-to-end analysis of global dengue surveillance data, including data cleaning, quality assessment, exploratory analysis, and epidemiological indicator development.
- Analysed disease burden, confirmed cases, severe cases, deaths, temporal trends, geographic distribution, and case fatality.
- Developed an interactive Power BI dashboard for surveillance monitoring and communication of epidemiological patterns.

GLOBAL TUBERCULOSIS BURDEN ANALYSIS — WHO Data | Python | Epidemiology | Power BI

- Analysed 5,347 observations across 42 variables from WHO tuberculosis burden estimates.
- Examined tuberculosis burden, incidence, mortality, case fatality, countries, and WHO regions.
- Performed data cleaning, transformation, descriptive analysis, epidemiological calculations, and visualization.

GLOBAL MALARIA EPIDEMIOLOGICAL ANALYSIS — WHO Data | Python | Power BI

- Analysed global malaria data to identify geographic, temporal, and regional patterns in disease burden.
- Compared countries and WHO regions using epidemiological indicators and developed dashboard components for public health audiences.

COVID-19 SURVEILLANCE ANALYTICS — WHO Data | Python | Power BI

- Analysed WHO COVID-19 surveillance data to assess disease burden, temporal patterns, and produced Power BI visualizations.

MPH EPIDEMIOLOGICAL RESEARCH — Healthcare Workers | Northern Nigeria

- Conducted MPH research examining sleep duration and mental health status among healthcare workers in Northern Nigeria (n=206).
- Applied statistical analysis to examine relationships between study variables and developed evidence-based findings.

EDUCATION & CERTIFICATIONS

EDUCATION

Master of Public Health (MPH) — Epidemiology
Ahmadu Bello University (ABU), Zaria, Nigeria | 2025

Higher Technical Diploma — Nursing & Midwifery
Higher Institute of Health Sciences & Tech, King Faisal University — Chad | 2020

LANGUAGES

- Arabic: Excellent (Native)
- English: Very Good
- French: Good

SELECTED CERTIFICATIONS

- Google Data Analytics Professional Certificate — Google / Coursera (2026)
- DHIS2 Aggregate Data Analysis Fundamentals — DHIS2 Academy / Univ. of Oslo (2026)
- MEAL Essentials Certificate — DisasterReady.org (2026)
- Statistical Analysis & Data Modeling in Healthcare — SkillUp / Coursera (2026)
- Foundations of Healthcare Data Analytics — SkillUp / Coursera (2026)
- Data Analysis Using SQL and Python (70 Hours) — (2025)

- Health Analytics Professional — HD Analytics (2025)
- Data Management & Statistical Analysis Using R — ABU (2024)
- Data Analysis using SPSS & Microsoft Excel — ABU (2024)
